

# M. AVINASH RAO

Chittoor, India | +91-9014155107 | mavinashrao5@gmail.com | linkedin.com/in/mavinashrao | github.com/mavinashrao

## SUMMARY

Computer Science graduate (AI & Data Science) with hands-on internship experience in Prompt Engineering, Generative AI, and Large Language Model integration. Reduced LLM response inconsistencies by 40%, improved model output accuracy by 25%, and built scalable Python-based AI pipelines using RAG, LangChain, and OpenAI APIs. Seeking an entry-level role as AI Engineer, Prompt Engineer, or NLP Engineer.

## PROFESSIONAL EXPERIENCE

### Prompt Engineering & Generative AI Intern | Small Fare

Oct 2025 – Feb 2026

Hyderabad, India

- Engineered 30+ Few-Shot, Zero-Shot, and Chain-of-Thought prompt templates using OpenAI and Gemini APIs, improving LLM response accuracy by 25% across production pipelines.
- Reduced response inconsistency by 40% through iterative prompt tuning, A/B evaluation, and hallucination reduction techniques across 500+ test cases.
- Integrated LLM APIs into Python application pipelines using REST API calls, reducing manual integration effort by 3 developer hours per sprint.
- Delivered weekly model evaluation reports using structured prompt testing workflows, directly shaping prompt strategy adopted by the product team.

### Python Developer Intern | Cognifyz Technologies

Jul 2025 – Sep 2025

Remote

- Developed Python automation scripts using Pandas and NumPy, reducing manual data processing time by 40% and saving 8+ hours per week.
- Analyzed 50,000+ records to surface data quality issues, improving downstream reporting accuracy by 35%.
- Refactored 5 legacy scripts applying PEP-8 coding standards, cutting average execution time by 20%.

## PROJECTS

### SmartCampus Bot – RAG-Powered AI Student Assistant | Python, RAG, LangChain, FAISS, OpenAI API

- Built a Retrieval-Augmented Generation (RAG) system using FAISS vector database and LangChain, achieving 92% contextual accuracy across 1,000+ knowledge base documents.
- Designed end-to-end prompt pipelines with embedding-based retrieval, reducing irrelevant LLM responses by 35% and expanding knowledge coverage by 60%.
- Developed Python backend with REST API endpoints handling 200+ concurrent queries at sub-2-second response latency.

### Smart AI Coding Tutor – LLM-Powered Learning Platform | Python, OpenAI API, Transformer Models

- Built an AI-powered coding tutor leveraging transformer-based LLMs and OpenAI API, achieving 95% code generation accuracy across 10 programming languages.
- Implemented real-time query processing and learning analytics dashboards tracking 15+ performance metrics for 100+ concurrent users.
- Optimized inference pipelines using prompt caching and context engineering, reducing average response latency by 45%.

## EDUCATION

### Bachelor of Technology – Computer Science & Engineering (AI & Data Science)

Oct 2022 – Apr 2026

Siddharth Institute of Engineering and Technology, Puttur | GPA: 9.02 / 10.0

Intermediate (12th Grade) – Sri Chaitanya Junior College, Tirupati

2020 – 2022 | 95%

Secondary School (10th Grade) – Ushodaya High School, Bangarupalyam

2019 – 2020 | GPA: 9.3 / 10.0

## TECHNICAL SKILLS

**Programming Languages:** Python, C, SQL

**Generative AI & LLMs:** Prompt Engineering, Few-Shot Prompting, Zero-Shot Prompting, Chain-of-Thought Prompting, RAG, LangChain, OpenAI API, Gemini API, Transformer Models, Hugging Face, Fine-tuning, Hallucination Reduction

**AI & ML Concepts:** NLP, Machine Learning, Embeddings, Vector Databases (FAISS), Context Engineering, Model Evaluation, AI Workflow Automation

**Libraries & Frameworks:** NumPy, Pandas, PyTorch, Scikit-learn, REST API

**Tools & Platforms:** Git, GitHub, GitHub Actions, Google Cloud, VS Code, Replit

## CERTIFICATIONS

Prompt Engineering – CodeSignal | Generative AI & LLMs – Google Cloud & Coursera | The Joy of Computing Using Python – NPTEL | Python Programming – Guvi & Great Learning
